

Memo

To: City of Meridian Staff and the General Public
From: Warren Stewart, Engineering Manager
Date: June 20, 2016
Re: 2013 Supplemental Specification Section 1102 Replacement

As of today's date, June 20, 2016, section 1102 of the Supplemental Specification to the Idaho Standards for Public Works Construction has been amended to address changes required by the 2016 Design Standards that went into effect June 1, 2016. The entire section of text and standard drawings T1 and T2 should be replaced with the revised edition posted on the Land Development Services page on the City of Meridian website. A new drawing, standard drawing No. T8, has been added. Project plans designed and approved prior to June 1, 2016 may be constructed under the previous version of the supplemental specifications.
