
INTEROFFICE MEMORANDUM

TO: ENGINEERING DIVISION
FROM: WARREN STEWART
SUBJECT: MERIDIAN STANDARD DRAWINGS
DATE: 9/6/11

It will no longer be necessary to include Meridian Standard Drawings in construction drawings submitted to the City for review and approval. However, the City of Meridian standard notes section of the plans must include a note requiring the contractor to have a copy of the latest set of standard specs on site during construction. The supplemental specifications that govern the project will be the ones in affect on the date the plans were approved for construction. Addendums to the specs are on the internet. All addendums in effect at the time the plans are approved must also be adhered to. If the contractor does not have a copy of the City's supplemental specifications on the job site, it could be grounds for a stop work order until the situation is resolved.
